

5.4.5

FBD

a)

$$\sum M_A = 0 \Rightarrow T d \sin 60^\circ + 2T d - dF = 0$$

$$\Rightarrow T = \frac{F}{2 + \sin 60^\circ}$$

$$= \frac{F}{2 + \sqrt{3}/2} = \frac{100 \text{ lbf}}{2 + \sqrt{3}/2} = \boxed{T = 34.9 \text{ lbf}}$$

b) $\sum F_x = 0 \Rightarrow$

$$A_x + \frac{T \cos 60^\circ}{1/2} = 0$$

$$A_x = -T \cos 60^\circ$$

$$= \frac{-F}{2 + \sqrt{3}/2} \cdot \frac{1}{2}$$

$$= \frac{-50 \text{ lbf}}{2 + \sqrt{3}/2}$$

$$\boxed{A_x = 17.45 \text{ lbf}}$$

Sum of moments about B = 0
So, $A_y = T = 34.9 \text{ lbf}$

c) $\sum M_B = 0 \Rightarrow -M = Td$

$$\Rightarrow \boxed{M = -Td = -69.8 \text{ lbf}\cdot\text{ft}}$$

$\uparrow 2'$

JUST TO THE RIGHT OF B.
